

**Division of Historic Preservation – Public History**  
**Office of the State Archaeologist**  
**List of Archaeological Consultants**  
Last Update – November 2009

The following individuals or organizations have indicated they are interested in conducting archaeological research in Wisconsin on a contractual basis, and they have certified that they are qualified archaeologists under the Secretary of Interior’s professional qualification standards (36 CFR 61, Appendix A.). This list is not inclusive as there may be other qualified individuals or organizations that have not contacted us. Contractors should contact the Register of Professional Archaeologists as well as Historic Preservation offices in neighboring states for additional listings (see below).

For convenience, names are both listed alphabetically and by geographic placement. The geographical placement of names on this list is based on the location of the institution or office facility and **does not** necessarily reflect the areas in which an archaeologist will work. After each listing, specific areas of expertise (prehistoric and/or historic archaeology) are provided.

This list is provided as a public service. It does not constitute an endorsement for any, or all, of these individuals or institutions. Nor is it a guarantee of satisfactory work. Standard business practices should be used in contracting for services with these individuals and institutions. Credentials and work history should be checked. Former clients should be consulted. The Division of Historic Preservation – Public History does not remove names from this list unless requested by the individual or institution concerned.

We remind you that federal or federally permitted or assisted projects must be conducted by a qualified archaeologist as defined in **Archeology and Historic Preservation: Secretary of the Interior’s Standards and Guidelines. The Division of Historic Preservation – Public History applies the Wisconsin** Archaeological Survey Guidelines for Conservation Archaeology in Wisconsin in the review of archaeological projects. A permit from the State Archaeologist is required to conduct archaeological research on public lands owned by the state and its political subdivisions. A federal (ARPA) permit is needed to conduct archaeological research on federal lands.

Additionally, all artifacts and information collected during the course of federal or federally-assisted projects must be curated in accordance with federal regulation 36 CFR Part 79, which is entitled “**Curation of Federally-owned and Administered Archeological Collections.**”

**Collecting, Preserving and Sharing Stories Since 1846**

**816 State Street Madison, Wisconsin 53706**
