## Certified Local Government Program

Preservation through Partnership: this is the goal of the Certified Local Government (CLG) Program. Local, State, and Federal governments work together in the Federal Preservation Program to help communities save the irreplaceable historic character of places. Through the certification process, communities make a local commitment to historic preservation. This commitment is key to America's ability to preserve, protect, and increase awareness of our unique cultural heritage found in the built environment across the country.

### How

Jointly administered by the National Park Service (NPS) and the State Historic Preservation Offices (SHPOs), each local community works through a certification process to become recognized as a Certified Local Government (CLG). Once certified CLGs become an active partner in the Federal Historic Preservation Program. Each community gains access to benefits of the program and agrees to follow required Federal and State requirements. The [How To Become a CLG](#) page will help you get started.
