BRDDDDVISS

DEVOTED TO THE IMPROVEMENT OF THE COLDINARD WARTE LYON.

VOL T

WHW-YORK PRIDAY, AUGUST 18 19

THE ST. ET WALKER.

During the autumn of 1798. I had occasion to travel, with my friend Harvey, through some of the western districts of Scotland. One evening, after a fatiguing walk we reached a little village, where we intended to remain for the night. It was pleasardly situated on an eminence, was picassivity situated on an emittence, overlooking a glen, through the wooded bottom of which a clear silver stream appeared winding on to the sea. The houses, which were mostly thatched, were built in a straggling manner, interspersed with trees and gardens and small rustic exclosures and possessed upon the whole greater air of comfort and neutness than is usual in our Scottish villages. Having taken some refreshment at the only inn the place afforded, and made such grrangements, with the landlord, as were necess in for our accommodation, we again sallied out to enjoy the beauties of the evening. which was one of the finest I ever remember to have seen.

The air was of that this and pure translucency which has been remarked as peculist to the autumnal season, and its balmy coolness, as it fanned our faces, was delightfully refreshing, after the hot and actiguing labours of the day. The sky was without a cloud; except a few of pale and fleery appearance which hovered over our heads; and others, whose broken though well-defined lines seemed to stretch like ded at the time, was forcibly self-ed to the bars of a fornace, across the glowing my remembrance by the erents which agreement to the Highlands rose one above another, with various shades and hoes as they receded from the eye, and were lost in the obscurity of distance, and which approached hearest to the Those which approached hearest to the specialty and whose irregular ridges partly spectator, and whose irregular ridges partly concealed their granulo brethrem were in regted with the rich purple unt of the hear the morning L was awakened by my rested with the rich purple unt of the heather which then flowered profusely on their bosoms, and seemed, while gleaming under a brilliant sky, to emulate the fary colouring of the rainbow. The more dis-tant summits were of an unmixed blue, successively becoming paler and paler, till their remote outline almost cluded the eye, and appeared only like dim and thenbetantial vapour, faintly traced on the borizon. Our steps insensibly led us towards a ri

sing ground, at some little distance from the village, where the roofless and weather besten walls of an angient monastic floor ing building appeared towering from be-bind some old fig and 18m trees, whose bind some old fig and 18m trees, whose ponderous trinks; seemed to have stood for centuries. An air of deep repose and desertedness hung over this spot, and condescriedness, hung over this spot, and con-trasted well with the gay and animated ap-pearance of the village green; where groups of noisy and happy children had just be-gut their erening game. It was a build-ing of no ordinary exent, and must have been while entires a place of green point dour and magnificence. Its supple ages

was now occupied as a receptable for the code of where he remains of many a lowly and ambitious peasant minglet unconsciously with the sakes of about, warriors and kings. Some wild fluit trees grew up among the tombs, thrusting is several places their long green arms through the lofty Gothic windows 's hild the grass and shrube, which waved on the runed walls and abouldering arches betokened the triming of decay, and showed now quickly on nature was reclaiming to her bosom the vain creations of man. Fragments of pillars and cornices, richly careed but green with the moss of ego, lay streamed about of with the moss of age, lay strewed about the ground, while those which still preserred their original situations seemed every moment to threaten a similar overthrow. The silence and loneliness which reigned around us, as we walked through the long rank herbage, growing profusely over the tombstones and headstones, with which the ground was sprinkled, did not fail to produce in our milids corresponding impress duce in our minds corresponding impressions of melancholy and gloom and so long did we yield to the indulgance of these sweet though painful feelings; that darkness had gathered over the fills, and the deep blue sky had become thickly studded with surs before we returned to the village. the village.

PREHDOM'S JOURNAL

KEW-YORK, AUGUST 15, 1828,

TRAVELLING SCRAPS. Addressed to my friend Observer.

My stay in Baltimore was so short that can state but little concerning the situation of our brethren. Those of them (but a few) with whom I formed an acquaintance, appearcd to advantage; but Balumore was never designed to be the abode of your humble ser. vant. A man of colour, educated at the north, can never feel himself at home in Baltimore: eridence in a court of justice against his fairer brethren, we cannot but perceive that there is little justice doled out to him by the republican laws of the state of Maryland. In vain to them does he appeal against the iniquity of his fairer brethren: to his evidence the law lends no listaning ear, and his only appeal is to his Almighty Father, unto whom the oppressed never ciy in vain.

There are in Baltimore several private coloured schools well attended; but when we take into consideration the number of persons we find the subject of education, saddy neglected; and as for a public free school that is entirely out of the question in such a slave state as Maryland, 5. Alas V Chica

Slavery is fast expiring in some parts of the state, through the exertion of the Abolition Societies, and we hope to see the day of its final extinction; and to have the pleasure of announcing the joyful event to our readers. was much pleased to learn that a few slave holders had adopted the benerolent plan of educating their young domestics, under a teacher in whose principles they could place implicit confidence :- and it is the current report that one of the coloured thurches is under their entire control in every respect, consequently no doctrine most there be preached, which has the least tendency to impeach the unnatural laws of Slavery.

We are astonished when we look into the system of slivery, and see how untiring its advocates are to support its tottering fabric. I was credibly informed, both in Baltimore and us admission; but seeing him permit some of the assembled virtues and seeded in mission; but seeing him permit some of one mission and the assembled virtues and the assembled virtues and the assembled virtues and the assembled virtues and the mission; but seeing him permit some of one mission was credibly informed, both in Baltimore and with a list of runaway slaves, who make it the tower classes to enter, we made and which the tower classes to enter, we made with a list of runaway slaves, who make it push in also; for, be assured, under certain earths and their sole business to risit our different northern cities for the purpose of apprehending pushing himself forward in the world. From so, shine plays throughout

From Arnoll's Natural Philosophy. CURIOUS PACTS.

Dilatation and convraction of substances by heat and cold.

" Dilalation. A rod of iron, which, when cold, will pass through a certain opening, and will he lengthwise between two certain points, when heated becomes too thick and too long to de either

" For accurate measurement, therefore, the rods or chains used as the measure must always be at the same temperature, or due al lowance must be made for the difference.

"The wall of a building had begun to bulge pat, so as to threaten its stability. No force tried could return u to perpendicularity, until the idea occurred of connecting it with the opposite wall by bars of non ; these were then heated alternately by lamps placed under them and while legthened in consequence, nuts were screwed light at their extremities; so that on again cooling and contracting, they pulled the wall back to its place.

"The iron rim of a coach wheel, when hea ted, goes on loosely and easily, and when afterwards cooled, it binds the wheel most lightly, giving incredible fireness and strength. Perosity in bodies apparently solid :-

"Bone is a ussue of shells and partitions, as little solid as a beap of empty packing boxes.

"Wood is a congeries of parallel tubes, like bundles of organ pipes. It has lately been proposed to prepare wood for some purposes, as for making the great wooden pins or pails used in ships building, by squeezing it to half its bulk between very strong rollers. It thus becomes nearly as heavy and as strong as met-

"A piece of wood sunk to a great depth in the ocean, and exposed to the pressure there; has its pores filled with water, and becomes as heavy as stone. Thus the boat of a whale ship, which has been dragged far under witer by a whale, on being afterwards drawn up was supposed to be bringing up a piece of back again. rock with it."

Elasticity :

"Elastic bedies vary much in the extent to which they yield without breaking, and in becomes permanently clongated. Glass, again, is perfectly elastic, for it will retain no permanent bend ; but unless in very thin plates indeed, it will not bend far wihous breaking.

on either. If the slab be net, it is seen that the fixed and known position of objects about the tvory had been a good deal flattened at him.

are illustrated by more carious examples :

a & body, we have seen, is tottering in proof man to be able to support his towering figure on a very narrow base with great firmness. This faculty is acquired slowly because of the

instances in the practice of walking on stills, heartburnwhich is general among the inhabitants of the sandy plans in the south west of France, called Les Landes. These plains afford tolerable pasturage for sheep; but during one season of the year they are that covered with Supply of Code to Engrand and Frace, water, and during the other it is most fatigu-Mr. Bakewell, in his introduction to Geology, ience, with steps of eight or ten feet in length: and they easily perform a journey of 30 or 40 miles a day. The shepherds, while watching their charge, post themselves in convenient stations, and with a long staff supporting them behind, and their sheepskin cloak and cap covering them above like a thatched roof ther have the appearance of little watch towers, or singular lofty tripod scattered over the face of the country.

Two thirds of our ordinary motions are governed by the habitual necessity we find of pre-

serving the centre of gravity.
"When a man rises from a chair, he is seen first to bend the body forward sq as to bring the centre or gravity over the feet pr base, and then he lifts it up. If he lift too soop, that is before the body be sufficiently advanced he falls

"A man standing with his beels close to perpendicular wall, cannot bend forward to pick up any thing that lies on the ground near him, without hunself-falling forward, because the wall prevents him from throwing part of bendix & r displacement of atoms, they return his body backward, to counterbalance the head the for it yields far but it is not perfectly clas- hille ver-ed in such matters, offered ten guintie, for when stretched much or, often, it soon eas for permission to try, under these circumlaid before him: he of course lost his mo-

> Goldsmith's sovereign remedy - A poor woman, understanding that Dr. Goldsmith had studied physic, and hearing of his great humanity, solicited him in a letter to send her something for her husband, who had lost his appear tite, and was reduced to a most melancholy state. The good natured poet waited on ber instantly, and, after some discourse with his patient, found him sinking into sickness and poverty. The doctor told him they should hear from him in an hour, when he would send them some pills, which he believed would prove efficacious. He immediately went home, and put ten guineas in a chip box, with the following label: "These must be used as necessity require: be patient, and of good heart." He sent his servant with this prescription to the comfortless mourner, who found it contained a remedy superior to any thing Galen or his ribe could administer.

Technicals. On a trial at the admiralty sessions, for shooting a seaman, the counsel for the crown asking one of the witnesses which he was for, plaintiff or defendant? "Plaintiff or defendant!" says the sailor, scratching his head; "why, I don't know what you mean by plaintiff or defendant. I come to speak for that man there!" pointing at the prisoner. 'You are a pretty fellow for a witness," said the counsel not to know what plaintiff of defendant meaus." Some time after being asked by the same counsel , what part of the ship he was jo at the time, "Abaft the binna, lar surface of the slab is found dried by the the masts, windows, fur iture, i.e. are conled the sailor; " an't you a pretty fellow for a counsellor," pointing arehly at him with his finger, "not to know what abast the binnacte

Explosion at Chesten On the 5th of Nov. 1772, a puppet-show, at which above one hundred speciators were present, was blown up by gunpowder at Chester, by which more than forty were killed on the spot, several got lockjaws, and others had limbs broken, or were despera ely wounded. The place of exhibition was over a grocer's warehouse, who, having occasion that evening for a supply of gunpowder, incautiously trusted a servant with a lighted candle to fetch it from his stock. The bodies were s' mutilated that several of them could not be owned. 1922, nearly forgotten.

Charles 2d and a sailor .- In the reign of Char es H. a sailor having received his pay, resorted to a nouse of ill same in Wapping, meet with, possessed of cash; and, accordingly, overtaking a gentleman in Stepney Fields, to whom he related his mishap, he insisted on man for some time expostulated with nim ou the atrocity of such behaviour, to no purpose; the lealousy of the millers and others, and arthe atrocity of such behaviour, to no purpose; the jealousy of the millers and others, and afthe tar was resolute, and the gentleman, dreading worse consequences, delivered his purse; but soon after had the sailor taken up, examined, and committed to Newgate, from whence Jack sent a shipmate with the following strange epistle to the king.

"King Charles, "One of your subjects, the other night, robbed me of forty pounds, for which I robbed sent me to Newgate, and he swear- I shall be hanged; therefore, for your own sake, save my life, or you will lose one of the hest seamen in your navy. " Jack Skifton."

His Majesty, on the receipt of the letter, immedia ely wrote as follows:

casex, where the ague made have among his men, the minister of the tillage where he lay was so harrassed with the duty, that he refused to burr, any more of them, without heing paid his accustomed fees. The captain made no words, but the next that died he ordered to no words, but the next that died he ordered to be carried to the minister's house, and laid upon the table of his great hall. This greatly embarrassed the poor elergyman, who, in the full-heis of the his great hall. This greatly embarrassed the poor elergyman, who, in the full-heis of the his great the poor elergyman, who, in the full-heis of the his great the poor elergyman, who, in the full-heis of the his great the captain word. The attuations is clarating that the poor elergyman who, in the stable of his great the captain word. The attuations is clarating to the history has been designed to the minister's house of the minister's house of the minister's house, and laid upon the table of his great hall. This greatly embarrassed the poor elergyman, who, in the full-heis of the history has been a more delightful as the manufacture would never dispute it with him, but would cause the dead man to be taken away to be a surface of the property of the more delightful as the manufacture would never dispute it with him, but would readily hury him and his whole comprise.

Brothers, the Prophet In 1791-2 a mechaout or passengers, Carries supper out of the browners, the Prophet in 191-2 a mechathorrower round the coach, and by his wonleful command of countenance, palmed himself in London as a prophet, and published with mich into some rhapsodical pamphlets, in which he styself with mich more of the same that the coach as a fresh passenger, to the astomishthe coach as a fresh tor, and were induced to abandon their busi arm with a gentleman upon the quar ness, sell their property at a low rate, and ness, sell their property at a low rate, and ness, sell their property at a low rate, and ness sell their property at a low rate, and their property are their property and their property are their property and their property and their property are their property and their property and their property and their property are their property and their property and their property are their property at a low rate, and their property are their property at a low rate, and their property are their property at a low rate, and their property are their property at a low rate, and their property are their property at a low rate, and their property are their property are their property and their property are their property are their property and their property are their property are their property are their property and their property are their was arrested by a warrant from the chancellor wife." ; when methat the chancellor as a lunatio, and confined in an asylum at lacontinued for many years; and in 1920, Bro-

Albion Mills .- In 1780 a flour company was riginated in London to grind corn by the force Albion Mills, was erected at the south cast this world." foot of Blackfriers bridge, of capacity sufficient to supply the greater part of the London asked a bysander was they see carrying ter the proprietors had received some threatening letters, the establishment was, by some means, set on fire, in March 1791, and burnt to the ground, presenting to the astonished metropolis one of the most rapid instances of destruction which had been seen for many years. The loss to the proprietors, and the perseveranother of the same sum, who has inhumanly ing jealousy of persons concerned in the ordinary flour trade, led to the dissolution of the company, and the site of the mills was converted into divellings, since called Albion place.

"For this time, I'll save thee from the gallows; bit if hereafter, then art guilty of the like, by G-d I'll have the hanged, though the best seaman in my navy. Thine. "Charles Rex."

Sir George Rooke—Sir George Rooke, before he was made admiral, had served as a force he was made admiral, had served as a captain of mariners upon their first establishment; and being quartered on the coast of Reserved as the force he was made admiral, had served as a captain of mariners upon their first establishment; and being quartered on the coast of Reserved as the first prompt he sensitely as the sailing of facts prompt the sensitely as the bot water carriage.
