MYSTERY OF NUMBERS.

The Cotton Tree in Cuba.

As you approach the plantation La Carlota you discover one of the most beautiful and grand objects, that exalts nature into the favourable situation, to the effect of the eye for it answers to another name of cotton, and is neither smaller nor more.

The Cotton, however, is something more, something that is a whole cloth stuff to the stuff to the natural world, where the earth is the mother of all things, and where its productions are the most valuable. The Cotton, in fact, is what we call the Cotton Tree.

One day the estate was owned by a number of rich men, who were rich in the sense that they possessed land, cotton, and other things that were valuable. The estate was large, and consisted of a large forest, a large field, and a large house. The Cotton Tree was in the forest, and the estate was in the field.

On this day the estate was visited by some of the rich men, who were curious to see how the Cotton Tree was growing. They asked the owner of the estate how much cotton there was in the field, and he told them that the cotton was growing well, and that there were many bales of it ready for harvesting.

The rich men were very pleased with what they saw, and they asked the owner of the estate if they could buy some of the cotton. The owner told them that they could, and that he would sell them as much as they wanted.

The rich men were very grateful to the owner of the estate, and they thanked him for his kindness. They then left the estate, and went on their way, having bought as much cotton as they wanted.

The Cotton Tree was a beautiful object, and it was a source of great benefit to the people who lived around it. It was a symbol of the beauty and richness of nature, and it was a sign of the goodness of the earth.

AFRICA

Of African rivers, most of the Nile, the Niger, and the Zambesi are the headwaters of the most important. The Niger, too well known to require a description, is a large and important river, which has its source in the mountains of Africa, and flows through a country of great extent, and is navigable for many miles. It has a river steamer, the "Niger," which runs the river at all seasons. The Zambesi, on the other hand, is a very extensive river, which is navigable for many miles, and is much larger than the Nile. The Zambesi has a steamer, the "Zambesi," which runs the river at all seasons.

African Free Schools

Notice to Parents and Guardians of Colored Children: Attention is called to the fact that the African Free Schools are now in operation, and that col- leges for colored children, by the national government, are being established in the various states. The schools are free, and are conducted by teachers, who are well prepared for the work, and are well paid. The schools are open to all children, of any race, and are supported by the state and federal government.
